## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/16/05 has been entered.

### ***Response to Amendment***

2. Applicant's amendment received on 1/19/05 has been entered and made of record. Currently, **claims 7-11 and 17** are pending.

### ***Allowable Subject Matter***

3. **Claims 7-11 and 17** are allowed (renumbered as claims 1-6, respectively).
4. The following is a statement of reasons for the indication of allowable subject matter:
- Regarding ***claims 7 and 17 (renumbered claims 1 and 6, respectively)***, in the examiner's opinion, it would not have been obvious to have the system, as claimed, include the limitations requiring at the data communication system, inputting a designation manually entered by an operator using an operation input unit, and designating an ID based on the manual designation inputted using the operation input unit, as well as at the limitations of the data processing terminal storing the communication result information and the document transferred which

Art Unit: 2622

correlate to each other, as required in claim 7, and independently storing the communication result information related to the document communication, as required in claim 17. The closest prior art, noted as Kikuchi *et al.* (U.S. Patent Number 5,552,901) and Ikeda *et al.* (U.S. Patent Number 5,720,014), each fail to expressly disclose all of these features. Specifically, Kikuchi discloses a data communication system, but fails to expressly disclose of inputting a manual designation and an input address of an external communication terminal, transferring the address of the external communication terminal, communication result information, and the transmitted document upon completion of the document transmission, and storing the result information and the document which correlate to each other. Continuing, Ikeda fails to teach of transferring the address of the external communication terminal, communication result information, and the transmitted document upon completion of the document transmission, and storing the result information and the document which correlate to each other. Because of these reasons, the claims are rendered allowable.

***Citation of Pertinent Prior Art***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

**Ejiri *et al.*** (U.S. Patent Number 6,639,693) discloses a data communication apparatus;

**Tashima** (U.S. Patent Number 6,567,178) discloses a fax mail apparatus; and

**Matsumoto *et al.*** (U.S. Patent Number 6,377,580) discloses an apparatus that manages a plurality of received data.
